»» Multi-level admin and management options.

Complete Defence Against Today's Email Threats for Small Medium & Large Enterprises.

Protect your enterprise from email threats including phishing, malware, spam, and other forms of objectionable or dangerous content with Spambrella, the dedicated email security solution.

This cloud-based enterprise-class Email Security, Continuity, Encryption & Archiving product is designed specifically for SME's and Large Enterprises. Spambrella is backed by Proofpoint best-of-breed security & infrastructure and provided at a price that delivers value and cost-savings.

Advanced Protection against Today's Threats.

Spambrella harnesses the capabilities of Proofpoint's enterprise security technology and infrastructure, used by some of the world's largest and most security conscious companies, and combines this with expert knowledge and understanding of the needs of the smaller enterprise.

Spambrella enhances security with spam and phishing detection, multi-layer anti-virus, a robust filter rules engine, email continuity with emergency inbox, policy-enforced encryption, an email archive based in the cloud and managed in a simple and intuitive user interface.

The Spambrella Approach

In order to address today's advanced email security requirements, an effective email solution requires accurate threat detection, a SaaS infrastructure to enable control and flexibility for the end user and methods of keeping business email up and running at all times. Spambrella leverages several techniques for this approach.

Proofpoint MLX & CLX Machine Learning Technology

Behind the scenes Spambrella is powered by Proofpoint MLX and CLX technology, Spambrella spam and phishing detection offers maximum protection against email threats. It examines hundreds of thousands of attributes in every email to accurately detect text, image and attachment-based spam or phishing emails, while automatically adapting to new threats as they appear. Spambrella technology delivers the industry's highest level of effectiveness at 99.99% against all types of spam email, using the latest advances in reputation and content-based analysis.

Additional Capabilities

»» Multi-tier administration.
»» Single, secure login.
»» Flexible platform with automated provisioning.
»» User provisioning capabilities.
»» Multi-level logins.
»» Domain Management.
»» Email Logs.
»» Active Directory Sync.
»» Complete scalability for your business.

Purpose-built for all Business Sizes

As a 100% cloud-based solution, there's no hardware or software to install or to worry about updating. By filtering mail at the Internet level before it reaches the network, Spambrella can save organizations considerable amounts on administrative tasks, bandwidth, end-user filtering, and even disk space on servers.

We know time is valuable, so Spambrella offers market-leading technology without the management and deployment headaches. Administrators can simply login to the online console and manage all users and account settings from one single secure platform.

Multi Layered Anti-virus Scanning

Spambrella advanced threat detection technology enables our anti-virus engines to provide clients with an unrivalled protection from viruses and other email-borne threats. All messages are meticulously scanned by our sophisticated virus engines, operating at the highest levels of accuracy, performance and effectiveness ensuring all known viruses are captured and blocked. For increased protection, Spambrella additionally employs Proofpoint heuristics scanning technology to discover email threats currently unknown to the system and protects against these in real time.

Industry leading SLAs

»» 99.999% Service Availability.
»» 99% Spam Effectiveness.
»» 100% Protection from known viruses.
»» < 1 minute email delivery.

Threat Protection Technology

Spambrella leverages the advanced power of Proofpoint Targeted Attack Protection, Proofpoint's Industry Leading email analysis solution, to provide enterprises with URL Defense and Attachment Defense, the only service that effectively detects, catches and analyzes malicious URLs and attachments targeting this market.

Data Loss Prevention and Content Filtering

Spambrella eliminates the risk inherent in individuals making security and disclosure policy decisions by implementing a user-transparent, centrally based, policy-driven data loss prevention filter. Users simply send email, and the appropriate action is automatically taken. Also the solution offers a powerful, customizable rules engine. This facilitates both content and event-based email management whilst providing highly sensitive levels of control regarding email traffic. The service allows users to control where messages are sent to and how they should be filtered depending on specified rules with full visibility and control of features.

Automated Email Encryption

Spambrella Email Encryption is purpose built to help businesses of all sizes reduce the potential negative impacts of data loss by automatically encrypting email. The need to secure communications that contain sensitive data has never been greater. Fines, negative publicity and loss of customer trust await companies, both large and small, who lose confidential or customer information.

Never Miss an Email with Spambrella Email Continuity

Many organizations rely heavily on email to do business but cannot justify the cost of building a highly redundant messaging infrastructure. A few minutes without email may be manageable but what about a few hours or a few days? According the recent survey conducted with Spambrella customers, 74% of respondents said that email downtime would result in customer contact disruption affecting customer satisfaction.

Keeping business email running as normal even when disaster hits is crucial to the smaller enterprise. Spambrella email continuity features make this possible with the emergency inbox, instant replay of lost or deleted emails over the last 30 days and email spooling.
